Re: APS rate case # E-01345A -11-0224

Comment in favor of decoupling AND energy efficiency

Chairman Pierce and Commissioners;

As an APS customer, I strongly urge the Commission to support the adoption of both increased energy efficiency And decoupling in the APS rate case

Our current system rewards utilities for selling more electricity than needed. I have had Ideal Energy come out to my house and make it vastly more efficient, saving us money right away. If APS maximized efficiency programs, it would build fewer new power plants, which saves everyone money.

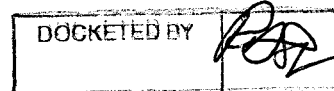

Please support energy efficiency and decoupling measures and provisions in the APS rate increase case.

Arizona Corporation Commission

RE: APS RATE CASE #E-01345A-11-0224
CONSUMER COMMENTS IN FAVOR OF
DECOUPLING & ENERGY EFFICIENCY

THIS LETTER IS IN SUPPORT OF
ENERGY EFFICIENCY & DECOUPLING
PROVISIONS RELATIVE TO THE PROPOSED
APS RATE INCREASE.

THIS APPROACH WILL BENEFIT CONSUMERS
LIKE ME IN APS SERVICE AREA.
THIS WILL HELP LOWER MY BILLS
& AID ME IN IMPROVING MY HOME'S
ENERGY EFFICIENCY.

THIS CASE COVERING DECOUPLING
WILL BENEFIT ME BY REDUCING THE
UTILITIES FINANCIAL INCENTIVES FOR
INVESTING MORE IN ENERGY EFFICIENCY
~~FOR~~ PROGRAMS.

THANK YOU FOR CONSIDERING THIS
CONSUMER OPTION.

Re: Consumer comments in favor of decoupling
and energy efficiency, APS rate case
E-01345A-11-0224

Dear Chairman Pierce and Commissioners:

As an Arizonan who is very concerned about costs (including environmental and water usage impacts) and energy waste, I strongly urge you to support the adoption of both increased energy ~~and~~ decoupling in the APS rate case.

Our current system rewards utilities for selling customers more ~~electricity~~ than they need. This paradigm wastes energy (^{largely} non-renewable coal, natural gas) and drives bills up: a lose-lose proposition. Decoupling reduces the utility financial disincentives for investing more in energy efficiency programs.

Just that you support the energy efficiency
measure and decoupling provisions set
forth in the proposed APS rate increase.
This would be a win-win proposition;
reducing use of fossil fuels + reducing pollution.

Thank you for considering these comments.

Sincerely,

Paise Murphy-Young

Re: Consumer comments in favor of decoupling and energy efficiency in APS rate case,
#E-01345A-11-0224

Dear Chairman Pierce and Commissioners,

As an APS customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge you to support the adoption of both increased energy efficiency measures and decoupling in the APS rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,
Mrs. EVELYN DEBAUN

Dear Chairman Pierce and Commissioners,

As an APS customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge you to support the adoption of both increased energy efficiency measures and decoupling in the APS rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,
Mr. Michael & Roseanne Haboush

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,
Mr. Brett Nelson

Dear Chairman Pierce and Commissioners,

As an APS customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge you to support the adoption of both increased energy efficiency measures and decoupling in the APS rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,
Ms. Carol Richardson

Re: Consumer comments in favor of decoupling, APS rate case, # **E-01345A-11-0224**

Dear Chairman Pierce and Commissioners:

I am an APS customer who is concerned about the costs of energy and energy waste and I strongly urge you to support the adoption of increased energy efficiency and decoupling in the APS rate case.

The current system is flawed. It rewards utilities for selling the public more energy than is needed. *Decoupling* reduces the utility financial disincentives for investing more in energy efficiency programs.

The energy saving conservation programs funded through the APS programs will help me lower my bills by providing a variety of energy efficient services. I can have a professional come to my home and patch leaks, change my air filters, and program my thermostat to yield a more energy efficient home.

Chairman Pierce and Commissioners, I ask that you please support the energy efficiency measures and decoupling provisions relative to the proposed APS rate increase. This will promote and encourage energy saving programs now and in the future, reduce our addiction to fossil fuel thus reducing pollution and harmful Green House Gases that amplify global climate change.

Thank you very much for your time and consideration,

Andrew Kraus
